## Top Skills

Artificial Intelligence for Business  
Generative AI for Leadership  
AI Agents

## Languages

Igbo (Native or Bilingual)  
Hausa (Elementary)  
English (Full Professional)  
Yoruba (Professional Working)

## Certifications

JavaScript Algorithm and Data Structures Masterclass  
JIRA and GreenHopper for Agile Teams  
AI Engineer Agentic Track: The Complete Agent & MCP Course  
Modern React with Redux  
LLM Engineering: Master AI, Large Language Model & Agents

# Hope Ogbons

Co-Founder | AI/LLM Engineer | Mentor | Tech Lead • React/Node • Python/Django  
Lekki, Lagos State, Nigeria

## Summary

Product-minded engineering leader with 10+ years building and scaling web and AI products. I've led cross-functional teams to ship performant, user-centric applications using React, Node.js, Python, and Django, and I love the zero-to-one grind of turning ideas into dependable systems. As an AI engineer, I design and deploy LLM-powered features (RAG, fine-tuning, evaluation, MLOps) and data pipelines that are secure, observable, and cost-aware. As a mentor, I coach engineers through architecture, code quality, and career growth—raising the bar while keeping delivery fast and focused.

## What I'm known for:

- Technical leadership from prototype to production (cloud, CI/CD, monitoring)
- Shipping high-performance, scalable services and frontends
- Clear architecture, clean code, and strong testing practices
- Building teams, processes, and a culture of continuous improvement

If you're solving meaningful problems with AI and modern web stacks, let's connect.

---

## Experience

RoboOffice Ltd  
Co-Founder / Principal Engineer  
May 2014 - Present (11 years 7 months)  
Magodo, Lagos

Andela  
Principal Frontend Engineer  
May 2019 - Present (6 years 7 months)  
New York, United States

eHealth Africa  
Senior Software Engineering  
February 2017 - May 2019 (2 years 4 months)  
Kano, Nigeria

SYSSOFT CONSULTANTS LIMITED  
Software Engineer  
January 2011 - March 2014 (3 years 3 months)  
Gbagada, Lagos
